

## HOW TO INSTALL NOTEBOOK 10 SOFTWARE AT HOME

1. Open Internet Explorer.

Type in the URL as: <http://smarttech.com>.

2. Click on **Software downloads** in the Quick Links section.  
(bottom right)

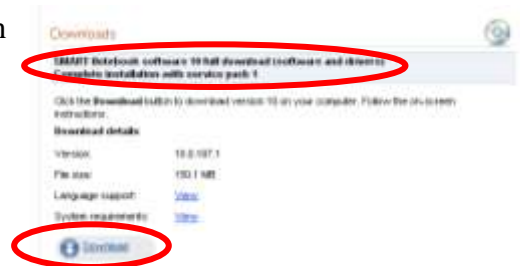

3. In the top right corner, under **SMART Notebook software**, click your home operating system. The software is available for **Windows or Mac OS**.

4. Scroll past the instructions at the top to the **Downloads** section in the middle of the page.

- The product key has been obtained for you and is contained in this document.
- Do remove any existing versions of Notebook software using the operating system of your computer.
- Select the **Full Download (software and drivers)**.
- Click on the **Download** button (with arrow).

5. Fill out the personal information required and click the **Start Download** button.

6. Click the **Run** button and follow the on screen installation directions from SMART Tech.

There is a series of windows that SMART uses for this installation process. Installation progress is shown. Some highlights:

- If prompted for the Product Key, **Copy** and **Paste** the **Product Key/activation code** directly into the field provided. The Key is all capitals:  
NB-AEDSC-D2PE5-YGWIJ-NWDIB (If input here, you can skip Step 8 below.)
- Please check all boxes to download all Educator Gallery Tools when prompted. This will take more time, but give the full set of resources available on KSD computers.
- It will take 15-20 minutes to complete the process.

7. Once the software is completely installed, open the product by double clicking on the desktop icon.

*Note: This software is now fully operational, but will expire after 30 days, unless the product key is input. The product key is required to fully register the software and use indefinitely.*

*Students needing this software at home do **not** have electronic access to this document due to KSD licensing with SMART Tech. Please email or send home a hard copy of this document if needed. Students can enter teacher information in place of their own personal information in Step 5 above.*

8. To activate/input product key to SMART Notebook software (if not done during install):

- **Right click** the SMART Notebook software icon in the Windows Notification area (bottom right hand corner of your Windows operating system computer).

- Select the **Welcome to Notebook** from the pop up menu.
- Choose the **Help/Support** tab, and then click on **Activate Software**.

- **Copy** and **Paste** the **Product Key/activation code** directly into the field provided and click **Next**. Key is all capitals:  
NB-AEDSC-D2PE5-YGWIJ-NWDIB
